BARKER CENTRAL SCHOOL DISTRICT

Child Find

The Barker Central School District provides special education services for children ages 3 to 21. You may also receive services for children ages 0-3 with special education needs through the Early Intervention Services program in your county of residence.

It is in the best interests of both parents and the school district to have needed special education services provided to children as soon as possible after that need has been determined.

If you suspect that your child has need for the provision of special education services due to an educational disability, please contact 795-3832 for further information.
